

# Cloud Security Services

Enhance the security posture of your cloud infrastructure and platforms

## Secure your cloud from advanced threats and exploits

Cloud infrastructure and platforms play an important role in accelerating the digital transformation of a company's business processes and user experiences. Securing the workloads that enable those processes and experiences is equally important and is the joint responsibility of both the cloud service provider and the business that is consuming the cloud resources.

Adversaries are looking to take advantage of those that lack the awareness of their responsibility, and they seek to exploit any ineffective cloud security settings and take advantage of common misconfigurations like:

- Improper public access configured and exposed access keys
- Excessive account permissions and ineffective identity architecture
- Disabled logging, missing alerts and inadequate network segmentation
- Public snapshots and images, and open databases and caches

CrowdStrike Cloud Security Services helps you prepare for advanced attacks on your cloud resources, respond to breaches in your cloud environment and enhance the security posture of your cloud infrastructure and platforms. These services bring deep cloud security expertise that comes from building and securing the cloud-native CrowdStrike Falcon® platform, combined with the extensive threat intelligence that CrowdStrike incident responders rely on to understand the latest tactics, techniques and procedures (TTPs) used by adversaries to exploit cloud environments.

## Key benefits

**Avoid cloud misconfigurations** in Azure, AWS, GCP and O365 that could be exploited by adversaries

**Identify current and past** adversary activity within your cloud environment

**Test cloud defenses** with offensive and defensive tests of your cloud infrastructure and platforms

**Stop cloud breaches** and recover your cloud environment with speed and precision

## Key service features

As a leading provider of endpoint and cloud workload protection technology, CrowdStrike delivers a full range of cloud security services to help you stop a breach in your cloud environment, enhance the security posture of your cloud infrastructure and platforms, and prepare for an advanced attack on your cloud.

### Respond to a breach in your cloud environment

**Incident Response for Cloud:** Respond to a cloud security breach with speed and precision.

### Enhance the security posture of your cloud platforms

**Cloud Security Assessment:** Identify cloud security misconfigurations and deviations from cloud security best practices.

**Cloud Compromise Assessment:** Uncover potentially malicious threat activity in your cloud environment and platforms.

### Prepare for an advanced attack on your cloud resources

**Red Team/Blue Team Exercise for Cloud:** Prepare your cybersecurity team and learn from experts as CrowdStrike's red team attacks and its blue team helps your team defend against a targeted attack on your cloud environment.

### Operationalize your CrowdStrike Falcon cloud security solutions

**Falcon Operational Support for Cloud Security:** Accelerate the deployment of your CrowdStrike Falcon Cloud Security solutions.

## About CrowdStrike Services

**CrowdStrike Services** delivers Incident Response, Advisory Services, Technical Assessments, Product Support and Training that help you prepare to defend against advanced threats, respond to widespread attacks, enhance your cybersecurity practices and controls and operationalize your technology platform.

We help our customers assess and enhance their cybersecurity posture, implement technologies, test defenses against real-world attacks, respond to incidents, accelerate forensic investigations, and recover from a breach with speed and precision. Harnessing the power of the CrowdStrike® Security Cloud and the CrowdStrike Falcon® platform, we help you protect critical areas of enterprise risk and hunt for threats using adversary-focused cyber threat intelligence to identify, track and prevent attacks from impacting your business and brand.

CrowdStrike:

## We stop breaches.

## Why choose CrowdStrike?

### CrowdStrike Security Cloud:

CrowdStrike has built its business around its secure cloud-native Falcon platform. Cloud security is critical for the company, as CrowdStrike Falcon is one of the largest-scale cloud-native security platforms, with petabytes of security telemetry data, and ingesting trillions of security events per day.

### Deep cloud security

**expertise:** CrowdStrike has more than a decade of experience securing the cloud-native Falcon platform. This platform enables the CrowdStrike mission of stopping breaches by ultimately securing the endpoints and cloud workloads for thousands of customers across the globe.

### Comprehensive indicators of misconfiguration:

The CrowdStrike Falcon® Horizon module uses indicators of misconfiguration (IOMs) to detect high-risk cloud security settings within dynamic cloud environments before they can be exploited by adversaries.

### Extensive cloud threat intelligence:

CrowdStrike incident responders rely on the extensive threat intelligence in the Falcon platform for detailed knowledge of threat actors and the tradecraft they use to exploit cloud environments.
