

CROWDSTRIKE FALCON FOR FINANCIAL SERVICES

Stay ahead of today's threats and stop breaches with the world's leading cloud-native platform trusted by top banks

CROWDSTRIKE FALCON: POWERING THE NEXT GENERATION OF PROTECTION FOR FINANCIAL SERVICES INSTITUTIONS

Financial services is the most targeted industry in the world today. Security teams struggle to keep customer data safe in the face of heavy regulation and sophisticated external and internal attacks. The CrowdStrike Falcon Platform is the world's leading cloud native security platform that secures the most critical areas of enterprise risk – endpoints and cloud workloads, identity, and data – to keep financial institutions ahead of today's evolving threats and stop breaches.

CROWDSTRIKE® FALCON PROVIDES:

- **Scalable, cloud-native architecture:** Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform enables real-time protection and visibility — giving financial institutions the freedom to replace and retire the complicated, performance-robbing security layers that clutter their environments.
- **A complete, integrated endpoint solution:** Using cloud-scale AI and machine learning, our Security Cloud weaves together trillions of data points from across security and IT operations to create one of the world's largest threat centric data fabrics and power an unparalleled platform that connects machines, identity and data for a unified, Crowd-powered approach to modern security.
- **Light-weight, cloud-native agent:** Our next-gen security is powered by the same, revolutionary light-weight agent - delivering superior protection and performance while reducing agent bloat and complexity.

KEY BENEFITS

Achieve key financial regulatory compliance requirements

Secure the most critical areas of enterprise risk – endpoints and cloud workloads, identity, and data

Enhance and augment your security teams

"As more and more organizations are looking for more effective solutions that can stop advanced, modern-day threats, I believe CrowdStrike Falcon is the answer."

Steve Phillpott, Chief Information Officer, Western Digital

KEY PRODUCT CAPABILITIES

ENSURES YOUR ORGANIZATION IS PROTECTED AGAINST ADVANCED, TARGETED ATTACKS AND EVOLVING ADVERSARY TRADECRAFT

- **United threat protection:** The Falcon platform's integrated anti-malware and advanced threat protection are combined in a single agent that protects endpoints and cloud workloads whether they are online or offline.
- **Stops silent failure:** Intelligent EDR delivers the most comprehensive visibility and the fastest search, providing insight into stealthy attacker activities, flagging potentially malicious processes and notifying security teams.
- **Advanced prevention and detection:** Cloud-scale AI, ML and behavioral protection unite to stop sophisticated, fileless attacks, including ransomware.

OPTIMIZES SECURITY OPERATIONS AND RISK MANAGEMENT

- **Key financial compliance regulations addressed:** CrowdStrike is compliant with several leading compliance mandates for financial institutions, including PCI DSS v3.2, FFIEC and NIST 800-53.
- **Prioritized event handling:** Automated, intelligent detection and prevention capabilities enable security teams to triage incidents based on criticality — remotely containing systems, if necessary.
- **Elite threat hunting:** Organizations that don't have the security resources to conduct their own threat hunting can benefit from Falcon OverWatch™, the managed threat hunting component of the Falcon platform. The OverWatch team of experienced security experts works 24/7 on your behalf, proactively hunting for threats and stopping breaches.

SCALES TO MEET YOUR NEEDS

- **Immediate time-to-value:** Zero on-premises infrastructure reduces cost and enables the Falcon agent to deploy and scale in minutes to meet your security needs — enabling speed, efficacy and scalability.
- **Complete risk protection:** The Falcon platform focuses on the most critical areas of enterprise risk and friction: endpoints and cloud workloads, identities and data — on- or off-network, on- or off-premises, hybrid or cloud — and is compatible with Windows, MacOS and Linux.
- **Streamlined management:** All updates are signatureless with zero performance impact to the end user.

CROWDSTRIKE DELIVERS NEXT-GEN PROTECTION ACROSS ENDPOINTS AND CLOUD WORKLOADS, IDENTITIES AND DATA FOR FINANCIAL INSTITUTIONS

Cybercriminals continue to innovate, so why shouldn't your security solution? CrowdStrike Falcon provides next-generation prevention, detection and response features capable of defeating even the most sophisticated attacks.

ABOUT CROWDSTRIKE

 CrowdStrike Holdings, Inc. (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with one of the world's most advanced cloud-native platforms for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform enables customers to benefit from rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: **We stop breaches.**
