# CROWDSTRIKE

# PATHWAY TO ENHANCED CLOUD SECURITY

THINK IT

CREATE A SECURITY STRATEGY FOR HYBRID IT

- Secure your cloud your way: private, public, hybrid
- Maximize IT capabilities for better outcomes
- Ensure security consistency across the hybrid estate
- Understand the mindset of the adversaries
- Protect critical data and crown jewels
- Future-proof integrations and security

BUILD IT

SHIFT LEFT AND AUTOMATE DEVOPS

- Build securely in the cloud
- Accelerate application delivery and time to market
- Automate security across the CI/CD pipelines
- Eliminate coding errors and protect container and serverless environments
- Enhance knowledge and understanding of cloud adversaries

SECURE IT
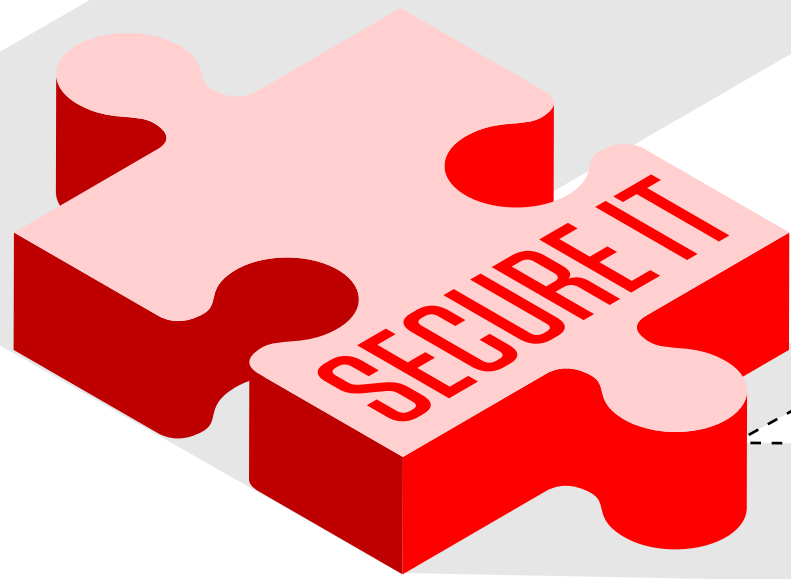

SEE MORE – KNOW MORE – DO MORE

- Gain visibility across all clouds and applications
- Simplify management and discovery of cloud resources and applications
- Automate and enforce security policies, compliance and governance
- Prevent identity-based threats
- Protect the control plane

STOP CLOUD BREACHES

- Prevent and eliminate security threats in real time for any workload, anywhere
- Automate cloud breach prevention
- Investigate and remediate incidents faster
- Uncover hidden threats with integrated cloud threat hunting and response
