

# World Wide Technology (WWT): A Global Technology Solutions Provider

Combine strategy, execution and partnership to modernize security across enterprise environments

## Challenges

In today's cybersecurity landscape, customers grapple with a multitude of challenges that revolve around siloed solutions, tool sprawl and the ever-elusive threat of adversaries slipping between the cracks. Security tools and technologies often lack the necessary communication and integration, and instead operate in isolation. This lack of cohesion leads to disjointed and inefficient security practices, and organizations often struggle to gain a comprehensive view of their point security solutions across their environment. Silos not only hinder the efficient sharing of threat intelligence, they also complicate incident response, leaving organizations vulnerable to potential breaches.

Tool sprawl compounds the cybersecurity dilemma. As organizations acquire a multitude of security tools to address specific threats, they can inadvertently create a complex and fragmented security infrastructure. Managing and maintaining these tools becomes cumbersome, leading to high operational costs and potential inefficiencies. Moreover, the proliferation of tools can overwhelm security teams, causing alert fatigue and diminishing their ability to discern genuine threats from false positives. The adversaries meanwhile are well aware of these vulnerabilities, and they exploit gaps and evade detection. This persistent threat, coupled with the challenges of siloed solutions and tool sprawl, necessitates a more holistic and integrated approach to cybersecurity to ensure robust protection against evolving threats.

## Key benefits

- **Proven Partnership:** WWT is not just a service partner, it is also a referenceable CrowdStrike customer. Its insights and experience bring tangible value to your security strategy.
- **Industry Leadership:** As a part of CrowdStrike's Partner Advisory Board and Technical Advisory Board, WWT is at the forefront of cybersecurity innovation.
- **Rapid Deployment:** Prebuilt test labs in WWT's ATC allow customers to quickly spin up test instances of the Falcon platform with Falcon modules and powerful integrations with Okta, Zscaler, ExtraHop, Cribl and Netskope.
- **Inclusivity and Scale:** As the largest minority-owned business in the United States, WWT adds another layer of diversity and scale to the partnership.

## Solution

CrowdStrike and WWT have partnered to secure the most critical areas of risk – endpoints, cloud workloads, identity and data. The unified, cloud-native CrowdStrike Falcon® platform keeps customers ahead of today’s adversaries and stops breaches. The combination of CrowdStrike’s global cybersecurity leadership and WWT’s unique security expertise – with its lab integration capabilities and complementary security services – delivers a resilient defense against sophisticated and evolving cyber threats. Customers benefit from superior protection, better performance, reduced complexity and immediate time-to-value, protecting the people, processes and technologies that power modern enterprises.

WWT’s Advanced Technology Center (ATC) labs allow you to see CrowdStrike Falcon modules in action and build customized integrations with approved security vendors – like Okta, Zscaler, ExtraHop, Cribl, Netskope and more – to demonstrate the power of an integrated security stack in defending against cyberattacks and improving your organization’s security posture. You can explore these integrations in a private sandbox lab with ease and ensure your requirements are met at scale, helping you maximize your security investments and take your security defenses to the next level.

## Business value

Use Case/Challenge	Solution	Benefits
Integrated security stack demonstration	Use prebuilt test labs to explore integrated security stack functionalities in a private sandbox environment	<ul style="list-style-type: none"> <li>· Rapid validation</li> <li>· Seamless integration</li> <li>· Enhanced understanding</li> </ul>
Holistic security infrastructure management	On-demand labs enable teams to upskill, build integrations and benefit from strategic analysis	<ul style="list-style-type: none"> <li>· Skill augmentation</li> <li>· Streamlined management</li> <li>· Strategic insights</li> </ul>
Comprehensive security services and operational excellence	End-to-end services cover seamless policy transitions, phased antivirus removal, custom integrations and detailed risk reviews	<ul style="list-style-type: none"> <li>· Security efficiency</li> <li>· Risk mitigation</li> <li>· Detailed assessments</li> </ul>

Together, CrowdStrike and WWT deliver customized services tailored to your organization and its requirements.

- **On-Demand Labs:** Upskill your team on new technologies, ensuring a seamless adoption phase.
- **Strategic Analysis:** WWT research provides actionable insights and expert guidance to mature your security operations.
- **Human Capital:** Leverage pre-screened IT resources that are tailored to meet your unique organizational needs.
- **Training and Simulation:** Benefit from cyber range training and tabletop exercises that simulate real-world scenarios, helping your team and executives prepare for the unexpected.
- **Seamless Transition:** Rely on WWT and CrowdStrike for policy migrations, phased legacy antivirus (AV) removal, and comprehensive onboarding and rollout plans.
- **Operational Excellence:** Utilize WWT services to build custom integrations with other tools and the Falcon platform, and assist with the operationalization and adoption of these integrations.
- **Risk Reviews:** Get a granular look at potential vulnerabilities with CrowdStrike’s [Active Directory Risk Review](#) and [Cloud Security Risk Review](#).

## See it in practice

WWT's ATC with the customized **CrowdStrike Integrated Lab** showcases relevant use cases that address customer requirements through the integration between the Falcon platform and partner solutions. WWT's ATC Lab is a B2B platform built on a collection of physical labs that are virtualized to create a collaborative innovation ecosystem to design, build, educate and deploy innovative technology products, integrated architectural solutions and digital business outcomes for customers, partners, employees and communities around the globe.

## Ready to secure your future?

Discover how the WWT and CrowdStrike partnership can redefine your cybersecurity strategy. For a deeper look into our joint capabilities and to learn more about the CrowdStrike Integrated Lab with WWT, click [here](#).

*WWT is a trusted CrowdStrike Solution Provider Partner, offering enhanced technical expertise with CrowdStrike Falcon products.*

## About WWT

Founded in 1990, World Wide Technology (WWT), a global technology solutions provider with \$17 billion in annual revenue, combines the power of strategy, execution and partnership to accelerate digital transformational outcomes for large public and private organizations around the world. Through its Advanced Technology Center, a collaborative ecosystem of the world's most advanced hardware and software solutions, WWT helps customers and partners conceptualize, test and validate innovative technology solutions for the best business outcomes and then deploys them at scale through its global warehousing, distribution and integration capabilities.

Make a new world happen.

## About CrowdStrike

**CrowdStrike** (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

**CrowdStrike: We stop breaches.**
