How Falcon Spotlight's ExPRT.AI Works

1 Exploit & Threat Intelligence

Ingest detailed exploit and threat intelligence from a number of sources including Crowdstrike's data set. While other models only apply vulnerability prioritization, the ExPRT AI has access to an immense amount of CrowdStrike data including EDR, vulnerability management, and threat intelligence information.

2 AI Model Conducts Continuous Analysis

The advanced real-time artificial intelligence model is continuously monitoring the evolving threat landscape to evaluate the likelihood of exploitation.

3 The CrowdStrike ExPRT Rating

The Falcon Spotlight ExPRT Rating is dynamically adjusted based on the likelihood of exploitation. This enables security teams to proactively prioritize the small percentage of vulnerabilities that are likely to be exploited, instead of reacting once vulnerabilities are exploited.

LOW   MEDIUM   HIGH   CRITICAL
