

Zero Trust Security Transformation

Fortify your cybersecurity posture

Secure endpoint devices and prevent unauthorized access with the CrowdStrike Falcon platform

Federal Agencies need to transition to a zero trust architecture to safeguard critical infrastructure and secure access to government systems and data.

CrowdStrike Services supports agencies on their zero trust transformation journey by helping them better secure their devices and workloads, and protect their user identities through the implementation and weaponization of the Falcon platform.

CrowdStrike is a recognized leader in next-generation cloud-delivered cybersecurity solutions. Our superior technology platform and deep human expertise helps agencies transform cybersecurity and stop breaches.

Get early access to the full value of the CrowdStrike Falcon platform with a services engagement license

Services Retainer
Procure credits for CrowdStrike Services to use along your transformation journey

Retainer Onboarding
Perform initial knowledge transfer to understand your environment and incident response process

Compromise Assessment
Conduct an initial assessment to determine active (or past) compromise activity in your network

Active Directory Security Assessment
Evaluate the security and effectiveness of your Microsoft Active Directory

Cybersecurity Maturity Assessment
Assess critical cybersecurity disciplines and receive actionable recommendations to enhance your security posture

Residency Program
CrowdStrike Operational Resident expert(s) to optimize and weaponize your Falcon deployment

Identity Security Assessment
Highlight major identity risk areas, best practices and misconfigurations known to be exploited by sophisticated threat actors

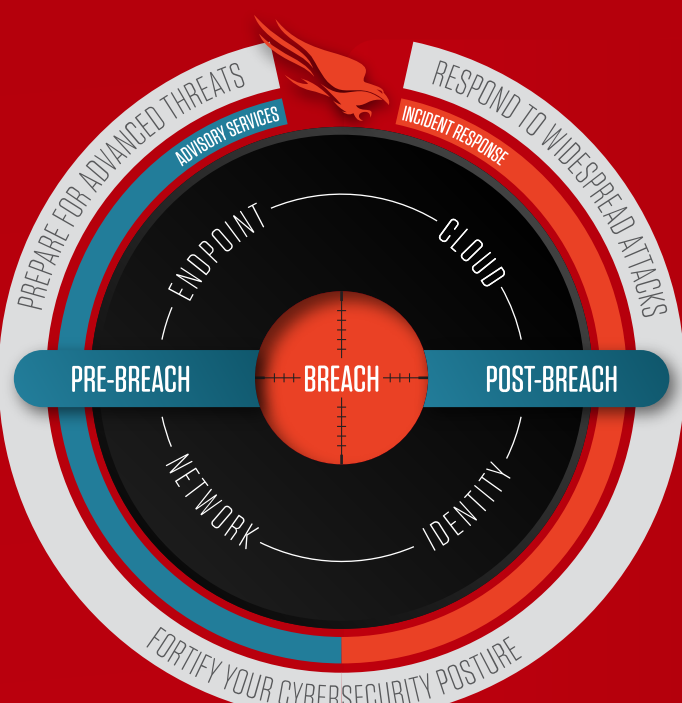

Technical Risk Assessment
Improve visibility into applications, accessibility and accounts, identifying vulnerabilities, missing patches, unprotected devices and weak security settings so you can proactively safeguard your network and reduce risk

Red Team / Blue Team Exercise
Test your enhanced defenses and identify remaining weaknesses against the most sophisticated threats

Falcon Complete
Should you decide to leave it to the experts, you have the option to transform to a fully managed detection and response (MDR) solution using CrowdStrike Falcon Complete

Incident Response & Endpoint Recovery
Should you become the target of a cyberattack, your Services Retainer provides on-demand access to our elite team of incident responders, forensic investigators, real-time recovery specialists and threat hunters

SOC Assessment
Assess the capabilities of your Security Operations Center to stop a breach

- Zero Trust while driving cloud adoption
- Unified EDR and Vulnerability Management
- Incident Response while enabling threat sharing
